

Your Branding Partner

OneLight™

New Generation Lightbox Technology

OneLight™

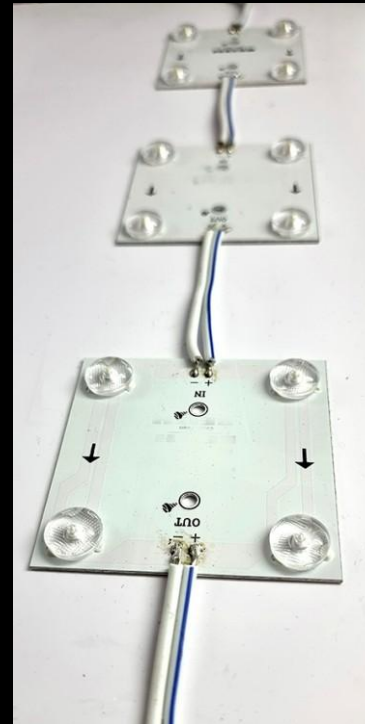

a groundbreaking new way to glow your brand

High Resolution - High Impact!

With photo quality printing up to 3m x 10m the super thin OneLight new generation lightbox creates a huge impact! And yet it is HIGHLY AFFORDABLE. The graphics are printed on high tech fabric that is very easy to install and more importantly - very easy to change!

The latest LED high dispersion low energy LED lighting spreads bright even lighting across even the largest frames.

New Lighting Technology

Latest Gel LED technology.

Low energy consumption block chain LEDs.

Long lasting - cost effective - Virtually no heat emission.

Daylight Bright White - No Discolouration.

High dispersion allows for extremely thin frames with even, bright lighting across the largest frames.

Inverters are small format & mounted within the frame.

2 year warranty on LEDs.

LED's are dimmable (optional extra).

Versatile Frame Configurations

Aluminium Frames available in several Profiles:

- Backlit: 40mm Wide (size dependent) /120mm Wide and be any size up to 3m x 10m (or more)
- Edge lit / double sided frames: 80mm lightweight frames / 75mm Heavy duty frames

Frames can be powder coated to any Pantone colour.

Frames can be wall mounted, free standing, ceiling hanging.

/flat mounted and can also be made into cubes & pylons.

Can be double sided.

Flexible deployment

OneLight lightboxes are extremely versatile

The thin low weight configuration allows OneLight to be deployed in new inventive ways from full “wallpaper” installations to free standing units or even flat on ceilings! Double sided frames are also a great option here !

Applications

Retail branding

Exhibitions.

Office décor.
