

Leading the race in lightbox technology:

NEW GENERATION LIGHTBOX: YBP's focus this year is to lead and advance new ground-breaking lightbox technology with high photo quality resolution to allow for extreme high impact of various brands and images. These lightboxes can either be wall mounted or free standing and can be used in exhibitions, office décor (reception areas, office partitions and boardrooms), home interiors, retail, airports, and the list goes on with the most popular now being ceilings and portable lightboxes.

Your Branding Partner (YBP) specialise in high-quality large format printing to bring you the very best quality branded solutions at affordable prices and within extremely short turnaround times.

YBP solutions range from the standard point of sale, free standing units, exhibition branding, outdoor signage right through to our new concentrated new generation fabric frames and lightbox technology.

AFFORDABILITY: We extrude our own aluminium frames that can be powder coated to most pantones, and we import our own LED's to bring a solution to you now at affordable prices with long term guarantees. The solution is simple and comprises an aluminium frame that is easy to install, a photo finish print that is easy to change and low energy LED's that make it very affordable to run.

Please allow us the opportunity to be your branding partner of choice by giving us the opportunity to quote. We look forward to making you look good.

Please contact lance Moor on 083 440 1004 / lance@yourbrandingpartner.co.za for more info.
